About these Doodsons

While trawling through the various published records for Australian residents quite a few Doodsons popped up who couldn't be linked, either to each other or to other Doodson family trees in the UK. Where I have managed to trace to other family trees I've identified the originating trees in yellow boxes. If anyone has any information about any of the people I've not been able to fit to other trees (see bottom left) please let me know!
